

h-index and other methods of measuring the productivity and impact of the published work of a scientist

Krzysztof Kluza and Grzegorz J. Nalepa

AGH University of Science and Technology, POLAND

GEIST workshop 08.09.2011 (rev. 19.11.2013)

<http://www.geist.agh.edu.pl>

*Cytowanie jest miernikiem tego,
ile warte jest to co piszemy...
Publish or perish!*

Outline

- 1** Introduction
- 2** Hirsch index overview
- 3** Other methods
- 4** Databases
- 5** Impact Factor
- 6** Tips

Why is this important

H-index and citations useful for:

- CV
- evaluation at AGH-UST
- scientific evaluation for NCN grants
- finding potential collaborators
- interpretation of your work by other scientists

Several reasons for citing:

- to provide background
- to provide related works
- to criticize or correct other works
- for self citations

Outline

- 1 Introduction
- 2 Hirsch index overview**
- 3 Other methods
- 4 Databases
- 5 Impact Factor
- 6 Tips

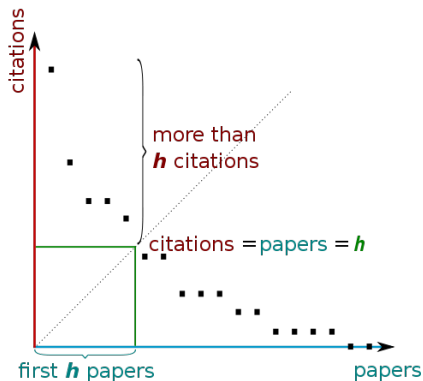

Simple bibliometric methods

- number of papers
- number of citations
- number of papers in journals with IF

Problem

A single method is not sufficient to measure both productivity and impact!

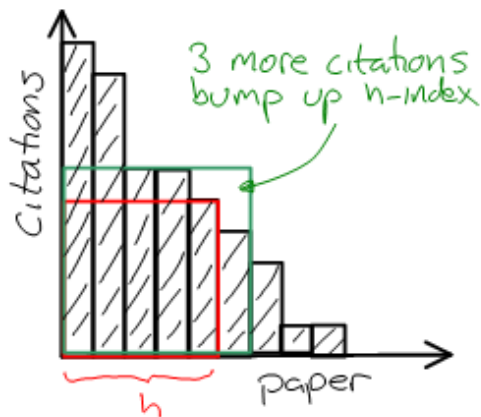

Hirsch index (h-index) definition

A scientist has index h if

- h of his/her N_p papers have at least h citations each,
- and the other $(N_p - h)$ papers have no more than h citations each.

How to increase h-index?

The citation number needed for increasing h-index

source: <http://entropy.info/2008/06/citation-trading>

Outline

- 1 Introduction
- 2 Hirsch index overview
- 3 Other methods**
- 4 Databases
- 5 Impact Factor
- 6 Tips

Other bibliometric methods

Modifications of h-index

- g-index
- hb-index
- hc-index (contemporary h-index)
- hl-index (individual h-index)
- h(2)-index
- e-index (excess citations index)

Much more: <http://sci2s.ugr.es/hindex/>

G-index

G-index definition

Given a set of articles ranked in decreasing order of the number of citations that they had received, the g-index is the (unique) largest number such that the top g articles received (together) at least g^2 citation.

Where one can find some information about my papers?

Selected scientific databases

- Web of Science (Thomson Reuters) – <http://apps.webofknowledge.com/>

DBLPvis

Web of Science

- the world's leading citation database
- over 12 000 journals from 256 categories
- over 148 000 proceedings from the most significant conferences
- the tool providing analysis and visualization capability
- part of Web of Knowledge, which provides ResearcherID integration
- isiwebofknowledge.com

More: http://thomsonreuters.com/content/science/pdf/Web_of_Science_factsheet.pdf

Google Scholar

- wide range of sources (indexes citation almost from anywhere available on the web)
- useful for papers not indexed by WoS or Scopus
- less authoritative than WoS
- difficult to search with co-authors
- additional software for h-index calculation

Citations in different sources

The image displays three overlapping browser windows, each showing a different source for the same article: "The HeKaTE methodology. Hybrid engineering of intelligent systems" by Grzegorz J. Nalepa and Antoni Ligeza.

- Top window (CiteSeerX):** Shows the article page on CiteSeerX. The URL is <http://citeseerx.ist.psu.edu/viewdoc/summary?doi=10.1.1.190.2993>. The page title is "CiteSeerX beta". The article title is "DOI: THE HEKATE METHODOLOGY. HYBRID ENGINEERING OF INTELLIGENT SYSTEMS".
- Middle window (Google Scholar):** Shows the article page on Google Scholar. The URL is <http://scholar.google.pl/scholar?q=The+HeKaTE+methodology&btnG=Szukaj&btnC=Szukaj>. The page title is "The HeKaTE methodology - Google Scholar".
- Bottom window (Web of Knowledge):** Shows the article page on Web of Knowledge. The URL is http://apps.webofknowledge.com/summary.do?SID=R2B1N&plgLo85tAMB&product=UA&qid=3&search_mode=.... The page title is "WEB OF KNOWLEDGE™".

Web of Science Search Engine

The screenshot shows a web browser window titled "Web of Knowledge [v.5.3] - All Databases Home". The address bar contains the URL "http://apps.webofknowledge.com/UA_GeneralSearch_inpr" and a search box with the text "Google". The main content area features the "WEB OF KNOWLEDGE" logo and the tagline "DISCOVERY STARTS HERE". Below the logo, there are navigation links: "Go to mobile site", "Sign In", "Marked List (0)", "My EndNote Web", "My ResearcherID", "My Citation Alerts", "My Saved Searches", "Log Out", and "Help".

The interface is divided into sections: "All Databases", "Select a Database", "Web of Science", and "Additional Resources". Under "All Databases", there are links for "Search", "Search History", and "Compound Marked List (0)".

The "All Databases" section contains a "Search" form with three input fields and dropdown menus. The first field contains "Nalepa GJ*" with an example "Example: O'Brian C* OR OBrian C*" and a dropdown menu set to "Author". The second field is empty with an example "Example: O'Brian C* OR OBrian C*" and a dropdown menu set to "Author". The third field is empty with an example "Example: Cancer* OR Journal of Cancer Research and Clinical Oncology" and a dropdown menu set to "Publication Name".

Below the search fields, there is a link "Add Another Field >>". At the bottom of the search section, there are "Search" and "Clear" buttons, and a note "Searches must be in English".

Are you applying for tenure, promotion or a new job? Do you want to include evidence of the impact of your research? Is your work cited in journals which are not ISI listed? Then you might want to try Publish or Perish, designed to help individual academics to present their case for research impact to its best advantage.

The software interface displays a table of publications:

Outline

- 1 Introduction
- 2 Hirsch index overview
- 3 Other methods
- 4 Databases
- 5 Impact Factor**
- 6 Tips

Impact Factor (IF)

- published by Thomson Reuters
- calculated for journals indexed in Journal Citation Report
- describes the importance of a journal within its field
- the higher the IF, the more important journal
- originally used for journals management in libraries

How to calculate IF of the Journal

X - the no. of cites in 2010 to articles published in 2008 and 2009

Y - the no. of articles published in 2008 and 2009

$IF_{2010} = X/Y$

About IF: http://thomsonreuters.com/products_services/science/free/essays/impact_factor/

Master Journal List: <http://science.thomsonreuters.com/cgi-bin/jrnlst/jloptions.cgi?PC=master>

Tutorial IF

- how to find a journal IF in Web of Knowledge
- how to get IF for a journal

WWW:

- `http://apps.webofknowledge.com/`

Web of Knowledge Additional Resources

The screenshot shows a web browser window titled "Web of Knowledge [v.5.3] - Additional Resources". The address bar contains the URL "http://apps.webofknowledge.com/additional_resources.do?highlighted_tab=additional_resources&prod". The page header features the "WEB OF KNOWLEDGE" logo and the tagline "DISCOVERY STARTS HERE", along with the Thomson Reuters logo. A navigation bar includes links for "Sign In", "Marked List (0)", "My EndNote Web", "My ResearcherID", "My Citation Alerts", "My Saved Searches", "Log Out", and "Help". Below this, a menu highlights "Additional Resources".

Analytical Tools:

- Journal Citation Reports®**
Journal performance metrics offer a systematic, objective means to critically evaluate the world's leading journals
 - Delivers quantifiable statistical information based on citation data
 - Provides a variety of impact and influence metrics, including the Journal Impact Factor and *Eigenfactor*™
 - Includes rank-in-category tables, journal self-citations, and Impact Factor boxplots

Web Sites:

- BiologyBrowser**
A free database of resources and links for the life sciences information community.
- Index to Organism Names**
The world's largest online database of scientific organism names.
- ResearcherID.com**
ResearcherID provides the global research community with an invaluable index to author information. Each author listed is assigned a unique number, which serves as a fast, easy identifier.

How can I use these resources?
These products and Web sites provide a variety of data and analysis relevant to research.
Note: All of the resource links will open in a second browser window.

JCR-Web 4.5 Journal Information

http://admin-apps.webofknowledge.com/JCR/JCR?RQ=RECORD&journal=INT+J+AP

Journal Impact Factor ⓘ

Cites in 2010 to items published in: 2009 = 29 Number of items published in: 2009 = 55
 2008 = 56 2008 = 52
 Sum: 85 Sum: 107

Calculation: $\frac{\text{Cites to recent items}}{\text{Number of recent items}} = 0.794$

5-Year Journal Impact Factor ⓘ

Cites in {2010} to items published in: 2009 = 29 Number of items published in: 2009 = 55
 2008 = 56 2008 = 52
 2007 = 52 2007 = 46
 2006 = 43 2006 = 0
 2005 = 32 2005 = 0
 Sum: 212 Sum: 153

Calculation: $\frac{\text{Cites to recent items}}{\text{Number of recent items}} = \frac{212}{153}$

Journal Self Cites ⓘ

The tables show the contribution of the journal's self cites to its impact factor. This information is also represented in the [cited journal graph](#).

Total Cites	418	Self Cites	45 (10% of 418)
Cites to Years Used in Impact Factor Calculation	85	Self Cites to Years Used in Impact Factor Calculation	15 (17% of 85)
Impact Factor	0.794	Impact Factor without Self Cites	0.654

How to get IF for a journal

Submission to Thomson Reuters

- submission min. 3 consecutive, current issues
- full journal title, ISSN, publisher, editor
- url, access (login, password),
- scope, brief statement on the unique features of the journal and how it is distinguished from others in the same field

Master Journal List: <http://science.thomsonreuters.com/cgi-bin/jrnlst/jloptions.cgi?PC=master>

Journal Selection Process:

http://thomsonreuters.com/products_services/science/free/essays/journal_selection_process/

Journal Submission Process: <http://science.thomsonreuters.com/mjl/selection/>

Journal Electronic Submission Form: <http://science.thomsonreuters.com/info/journalsubmission/>

Basic requirements

- timeliness of publication according to its stated frequency
- the peer-review process
- full text in English (at very least only the bibliographic information)
- international editorial conventions
 - informative journal title
 - fully descriptive article titles/abstracts
 - complete bibliographic information
 - full author's address information for every author
- diversity among the journal's authors, editors, board members
- citation data (total citation received or the citation record of the contributing authors, self-citation rate)
- impact of the journal in the context of journals in the same discipline
- the journal has to enrich the database
(better if the topic is not already adequately addressed in existing coverage)
- in case of regional journals they can target a local audience

How many journals are selected for inclusion to the database?

Only about 10-12% of submitted journals!

Journal Self Cites

The tables show the contribution of the journal's self cites to its impact factor. This information is also represented in the [cited journal graph](#).

Total Cites	418	Self Cites	45 (10% of 418)
Cites to Years Used in Impact Factor Calculation	85	Self Cites to Years Used in Impact Factor Calculation	15 (17% of 85)
Impact Factor	0.794	Impact Factor without Self Cites	0.654

Journal Immediacy Index

Cites in 2010 to items published in 2010 = 1
 Number of items published in 2010 = 60
 Calculation: $\frac{\text{Cites to current items}}{\text{Number of current items}} = \frac{1}{60} = 0.017$

Journal Cited Half-Life

The cited half-life for the journal is the median age of its items cited in the current JCR year. Half of the citations to the journal are to items published within the cited half-life.
Cited Half-Life: 5.9 years

Breakdown of the citations to the journal by the cumulative percent of 2010 cites to items published in the following years:

Cited Year	2010	2009	2008	2007	2006	2005	2004	2003	2002	2001	2000-all
# Cites from 2010	1	29	56	52	43	32	40	39	42	45	39
Cumulative %	0.24	7.18	20.57	33.01	43.30	50.96	60.53	69.86	79.90	90.67	100

Cited Half-Life Calculations:
 The cited half-life calculation finds the number of publication years from the current JCR year that account for 50% of citations received by the journal. Read help for more information on the calculation.

Cited Journal Graph

[Click here for Cited Journal data table](#)

This graph shows the distribution by cited year of citations to items published in the journal INT J AP MAT COM-POL.

Citations to the journal (per cited year)

- The white/grey division indicates the cited half-life ($t_f < 10.0$). Half of the journal's cited items were published more recently than the cited half-life.
- The top (gold) portion of each column indicates Journal Self Citations: citations to items in the journal from items in the same journal.
- The bottom (blue) portion of each column indicates Non-Self Citations: citations to the journal from items in other journals.
- The two lighter columns indicate citations used to calculate the Impact Factor (always the 2nd and 3rd columns).

Journal Self Cites

The tables show the contribution of the journal's self cites to its impact factor. This information is also represented in the [cited journal graph](#).

Total Cites	235	Self Cites	6 (2% of 235)
Cites to Years Used in Impact Factor Calculation	34	Self Cites to Years Used in Impact Factor Calculation	3 (8% of 34)
Impact Factor	0.330	Impact Factor without Self Cites	0.301

Journal Immediacy Index

Cites in 2010 to items published in 2010 = 1
 Number of items published in 2010 = 38
 Calculation: $\frac{\text{Cites to current items}}{\text{Number of current items}} = \frac{1}{38} = 0.026$

Journal Cited Half-Life

The cited half-life for the journal is the median age of its items cited in the current JCR year. Half of the citations to the journal are to items published within the cited half-life.
Cited Half-Life: 4.9 years

Breakdown of the citations to the journal by the cumulative percent of 2010 cites to items published in the following years:

Cited Year	2010	2009	2008	2007	2006	2005	2004	2003	2002	2001	2000-all
# Cites from 2010	1	13	21	39	49	25	25	13	16	7	26
Cumulative %	0.43	5.96	14.89	31.49	52.34	62.98	73.62	79.15	85.96	88.94	100

Cited Half-Life Calculations:
 The cited half-life calculation finds the number of publication years from the current JCR year that account for 50% of citations received by the journal. Read help for more information on the calculation.

Cited Journal Graph

[Click here for Cited Journal data table](#)

This graph shows the distribution by cited year of citations to items published in the journal INT J ARTIF INTELL T.

Citations to the journal (per cited year)

Cited Year	Other Cites	Self Cites	> Half-Life	< Half-Life
2010	1	0	0	0
2009	13	0	0	0
2008	21	0	0	0
2007	39	0	0	0
2006	49	0	0	0
2005	25	0	0	0
2004	25	0	0	0
2003	13	0	0	0
2002	16	0	0	0
2001	7	0	0	0
2000-all	26	0	0	0

The white/grey division indicates the cited half-life ($t = 10.0$). Half of the journal's cited items were published more recently than the cited half-life.

The top (gold) portion of each column indicates Journal Self Citations: citations to items in the journal from items in the same journal.

The bottom (blue) portion of each column indicates Non-Self Citations: citations to the journal from items in other journals.

The two lighter columns indicate citations used to calculate the Impact Factor (always the 2nd and 3rd columns).

Outline

- 1 Introduction
- 2 Hirsch index overview
- 3 Other methods
- 4 Databases
- 5 Impact Factor
- 6 Tips**

Outlook

Tips

- tell your colleagues: "please read my paper – maybe you will find it worth a citation"
- co-authors can help to publicize the paper
- the right keywords in the paper title
- increase your readership audience (Google)
- self citations
- review articles

Long term tips

- journals of a high impact
- conferences with highly-respected proceedings
- work in a sub-field that is growing
- focus on most recent papers

Outlook

Tips

- check your h-index in various sources
- monitor h-index of your colleagues
- review paper with cites to your colleagues
- report lack of paper or citation in WoS
- monitor your papers and report if they are missing using the form:
<http://science.thomsonreuters.com/techsupport/datachange/>
- advertise your research on sites such as <http://www.researchgate.net> or <http://www.academia.edu>

Remember

- self citations are not as respected as citations!
BUT in general they are needed to avoid claim of selfplagiarism!

The End

Thank you for your attention!
Any questions?
